Notes to the financial statements

(Unaudited - see advisory to readers)

March 31, 2020

1. Summary of significant accounting policies

Revenue and expenditure (operating fund)

Major revenue and expenditure items are recorded on an accrual basis.

Principal and interest payments relating to term debt are recorded as an expenditure when due.

Utility plant in service acquired with operating funds is recorded as an expenditure when incurred.

Capital fund

Utility plant in service

Utility plant in service is recorded at cost. Funds received through capital assistance programs, cost sharing arrangements or loan forgiveness are treated as deferred contributions and are amortized at the same rate as the related asset.

Depreciation

The Water Utility records depreciation which is calculated based on a formula prescribed by the Public Utilities Board. The Public Utilities Board requires that an amount of cash equal to the depreciation claimed is to be transferred to a special bank account which is used to help fund replacement of existing plant in service, or subject to approval by the Public Utilities Board, to repay principal on term debt. The Water Utility has set aside cash in the amount of \$0. Interest on depreciation funds is retained in the Capital fund.

Use of estimates

In preparing the Water Utility's financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the period. Actual results could differ from these estimates.

Financial instruments

The Water Utility's financial instruments consist of cash, receivables, and payables and accruals. Unless otherwise noted, it is management's opinion that the Utility is not exposed to significant interest, currency, or credit risks arising from these financial instruments. The fair value of these financial instruments approximates their carrying values, unless otherwise noted.
