

ROAD NAMING

In assigning a 911 civic address for your property it has been necessary to provide you with a temporary road name in the form of a number. We encourage you to change this name. To do so please have a petition signed by all residents of the road stating the present name of the road and the requested road name (please ensure that you provide three choices of names) and give this to your Municipal Councillor.

The requested road name will be reviewed by the Eastern District Planning Commission and the Department of Transportation. This will ensure that the name has not already been used in the County. The proposed name will then be approved or disapproved by Council. Once the Municipality receives approval of the road name you will be notified.

The residents of the road are responsible for placing a sign at the intersection of your road with the main road. Guidelines for these signs may be obtained from the Department of Transportation.
