

Homewood Pathfinder – Evolving your MFAP at no charge!

With Homewood Pathfinder, you select your preferred approach to accessing support. You can choose from a virtual experience, a fully 'live' experience by telephone, or a blended experience. It's this choice that improves your Member and Family Assistance Program (MFAP) by allowing you to instantly access many tools, resources and service recommendations in the way you are most comfortable with. Choice empowers you to be better informed for a more meaningful and impactful experience.

We've added new, intuitive functionality and design with proprietary algorithms to create Canada's best in class experience supported by 40 years of MFAP experience and over 140 years of mental health leadership and expertise.

My Dashboard - the heart of the Pathfinder experience. It's a place to start new Pathfinder journeys, access specific resources, check-in on counseling appointments or simply browse Homeweb. Your firefighters will have access to great tools such as PulseCheck.

PulseCheck

Allows firefighters to check in at any time and let Homewood know how you are feeling. With a simple slide, you can receive recommendations based on the intensity of your feelings. Whether it be suggesting relevant e-courses or recommending booking a session with a counsellor, PulseCheck is here to understand the unique needs of your firefighters. As a fire service leader, this will give peace of mind knowing your firefighter has this unique tool at their fingertips.

Call us anytime. It's your call.
